Settings Panel :

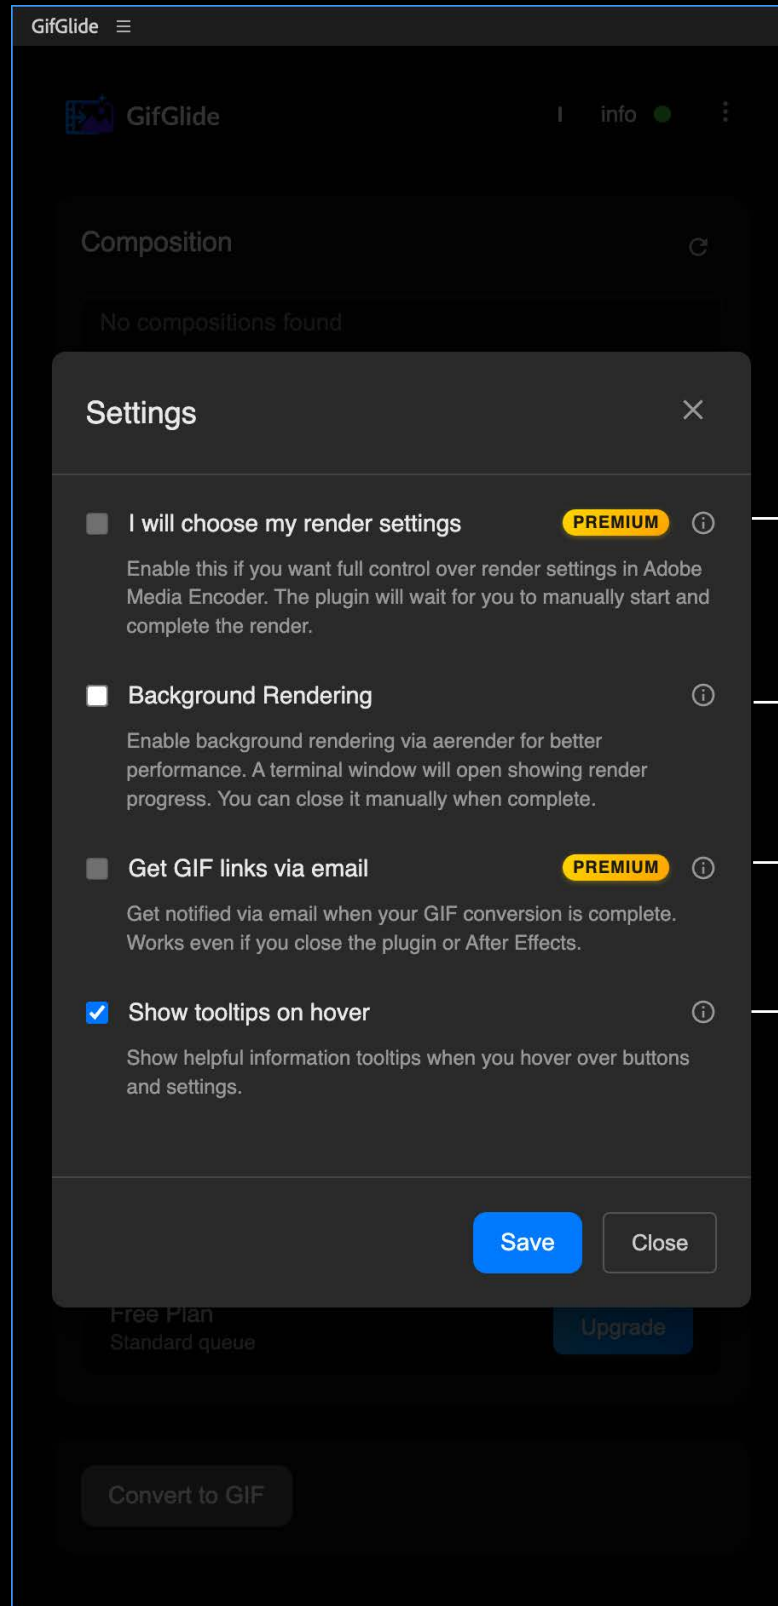

To open advance settings of the plugin.

About the current plugin version and more info.

You can check for the latest update of the plugin.

Logout option logs you out of the plugin.

Settings Panel :

I will choose my render settings - This option will queue your renders to Adobe media encoder and will wait for you to start the render. You can choose your own preset or settings to render. This option is only available for premium users.

Background Rendering - This option will use aerender to render the video in background. You can keep on using after effects normally, everything will be processed in background.

Get GIF links via email - This option will send you an email with direct links of your GIFs. Once your conversion is in queue you don't have to keep the plugin and after effects opened. You can close both and relax. This option is only available for premium users.

Show tooltips on hover - As the name suggest, this option will turn on/off the tooltips of the plugin on hover.
